

COVER LETTER

Rithish S

Computer Science and Engineering | Bannari Amman Institute of Technology

Application: Software Engineer I – LG Ad Solutions

Dear Hiring Team at LG Ad Solutions,

I am writing to express my interest in the **Software Engineer I** position at **LG Ad Solutions, Bangalore**. I am a Computer Science and Engineering student at **Bannari Amman Institute of Technology**, graduating in 2028, with a strong interest in backend engineering, distributed systems, and scalable software development.

I have built and worked on projects involving **Node.js, Python, Java, PostgreSQL, MySQL, MongoDB, Redis, Docker, Kubernetes, and AWS**. Through these projects, I have gained practical experience designing backend services, working with microservices, implementing queues and concurrency controls, and building reliable systems. I particularly enjoy understanding how systems behave at scale and designing solutions that are maintainable and performant.

I also have a strong foundation in **data structures and algorithms and core Computer Science concepts**, having solved **1000+ problems on LeetCode**. My academic and project experience has given me exposure to **DBMS, operating systems, computer networks, OOP, system design, distributed systems, and cloud technologies**.

One of my recent projects, **DBVault**, involved designing a database backup system using a microservices architecture with **Redis, BullMQ, Docker, and cloud storage**, including job scheduling, concurrency control, distributed locking, rate limiting, and monitoring considerations. This experience aligns closely with LG Ad Solutions' focus on scalable and reliable distributed systems.

I am particularly interested in this opportunity because it combines **large-scale systems, big data, cloud technologies, and AI-driven applications**. While I am still early in my career, I am comfortable learning new technologies quickly and would be excited to deepen my knowledge of technologies such as **Spark, Databricks, and large-scale data processing** while contributing to the engineering team.

I would welcome the opportunity to contribute my problem-solving skills, backend development experience, and enthusiasm for distributed systems to LG Ad Solutions.

Thank you for considering my application.

Sincerely,

Rithish S
